What's New at Western

Campus Recreation: The \$34 million Sports and Recreation Services facilities is now open. It houses five gymnasiums, five squash courts, an Olympic-sized swimming pool, aerobics studios, and new weight rooms.

Biotron: This new science building is a world class environmental science and climate change research facility featuring six biomes. The Biomes allow researchers to design and simulate pertinent environmental scenarios in order to assess the impact of an array of environmental factors on organisms, including accelerated climate change scenarios, plant-soil-insect-microbe interactions, and bio-risk assessment of emerging technologies and pollutants.

New Green Engineering Building: The Claudette MacKay-Lassonde Pavilion will house research on green technologies, processes and materials and, at the same time, the building will feature the most advanced environmentally sustainable construction technologies and methodologies.
